Subject: Sample Receipt issues with ASR #6163 (Westlake Landfill sampling)

Issue 1: No extra volume for the LDL VOA QC (MS/MSD) was collected/submitted as noted/needed/required on the sampling instructions provided with the field sheets and tags (and blank tags for labeling QC=MS/MSD volume).

Resolution: Issue was noted on the COC, analyst was informed and QC (MS/MSD) may not be provided for LDL VOA analysis.

Issue 2: Sample 18 was not listed on the COC but the RSCC received a sample and field sheet were received.

Resolution: RSCC added sample 18 to the COC and noted this issue.

Issue 3: Upon processing the vials in the lab., it was observed that some of the LDL VOA vials had small pea- to dime-size air bubbles in them.

Resolution: Issue was noted on the COC, analyst has been informed to analyze the vial with no air bubble and/or the smallest air bubble and note in the report comments of the LDL VOA data in LIMS.

A copy of this email will be put in the primary Analytical Data File (ADF) for this ASR.

Nicole.
